

Development of Testing Mechanism for National Skill Standard in Logistics

Client: *Thai Logistics and Production Society (TLAPS)*

Period of Appointment: *2012-2013*

AMP Consultants Ltd. was commissioned by TLAPS to advise the Department of Skill Development, Ministry of Labour to produce draft national skill development standards testing for four logistics professions in accordance with the needs of the logistics industry and business organizations taking account of the skill standards of ASEAN countries.

Tasks included the drafting of a National Labour Standard Test Method that recognised the needs of businesses and employees. The tests had to reflect the practical skill requirements of business, industry and workplace and had to conform with the current employment regulations of ASEAN countries.

Key activities: Development of an effective test of knowledge and ability; public relations, personnel management and analysis; meetings with managers in the sector; and a conference involving all stakeholders in the system.
