

The Study on Development of Common Ticketing System for Public Transport and Establishment of the Central Clearing House

Client: Office of Transport and Traffic Policy and Planning (OTP), Ministry of Transport
Period of Appointment: 2008-2009

AMP Consultants Ltd.; AMP Development Ltd., AMR Asia Co. Ltd., G-Soft Co., Ltd. and PlanPro Corp. Ltd. were commissioned by OTP to carry out a Study of a Common Ticket System for Public Transport and the Establishment of a Clearing House.

Major tasks included study and analysis of the technology for common ticket systems; recommendations for the establishment of technical standards for common tickets and the clearing house; recommendations for the form, guidelines and process for applying this system on public transit and to other electronic businesses in Bangkok Metropolitan Area and its surrounds.

Key objectives of this project were to add value to public transit services whilst also encouraging modal shift towards public transport.
