

Traffic Management in Central World Plaza and Tower

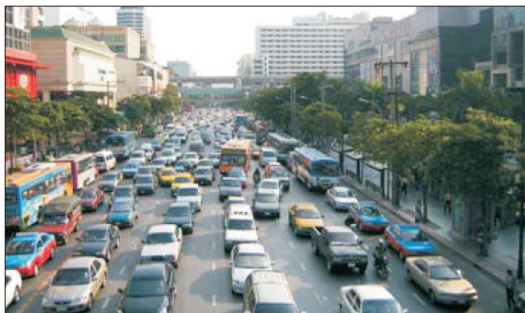

Client: Central Pattana Public Co Ltd.

Period of Appointment: 2003 to 2004

AMP Consultants Ltd has been Commissioned by the Central Pattana Public Company Limited, one of the largest Retail companies in Thailand, to study traffic management in Central World Plaza and Tower.

In this study, AMP has suggested that to improve traffic flow in parking area and outside buildings, it should be allowed the free-flow circulation routes for parkings and around the building. In addition, the application of public transport and the future plans for traffic management for the Central World Plaza and Tower are recommended.

Therefore, the key tasks are as follows:

- Free-flow Traffic Circulation routes for Parking,
- Traffic Management in the Central World Plaza and Tower,
- Application of public Transport
- Traffic Forecast for the future plans in terms of customer service and accessibility.
