

Transfer Ticketing Technology on Public Transportation in BMR

Client: Department of Land Transport
Period of Appointment: 2001 - 2002

Department of Land Transport had committed AMP Consultants Ltd to advice on Transfer Ticketing Technology on public transport, eg. rail, bus, and ferry, including investment schedule. As a result of the study, it aims to provide a guideline for applying this technology in Bangkok Metropolitan Region on public transport, especially on a high comfort services. In addition, the consultant advised on the conceptual design for the operators.

Although the transfer ticket is a new system in Thailand, the consultant has suggested that at the beginning, BMTA should apply the Thermal tickets for non-airconditioned buses, contactless smartcard for air-conditioned buses, BTS, and MRTA. Then, it should be extended to apply the contactless smartcard for other business, such as food, sport, book, and kiosk.

However, the clearing house system is an important process which should be achieved for the transfer ticketing before applying, the high technology on transfer ticketing business.
