

# Public Transport Study in Bangkok Railroad Improvement Project

Client: State Railway of Thailand

Period of Appointment: 1999 to 2001

AMP Consultants Ltd contributes significantly to overall transport concept and demand forecasting. These tasks included review, define and assess transport conceptual options in order to identify the most possible projects to be taken by ranking system as well as to develop an initial estimate of likely patronage demand considering more environmental factors which are critical to the financial viability of the chosen project.

In 1999, AMP Consultants Ltd together with JMP Consultants Ltd, L.E.K. ELECTROWAT, TEAM and ASDECON were appointed, by the State Railway of Thailand (SRT) to develop a program for upgrading of the railroad infrastructure and operations on the main lines in Thailand. Special emphasis is given to the rapid increase of demand on mass transit for the Bangkok Metropolitan Regional over the next 20 years.
